Summary

Motivated and detail-oriented Software Engineering undergraduate currently pursuing a BSc (Hons) in Computer Science – Software Engineering and a completed HND in Computing graduate. Experienced in full-stack software development through academic and practical projects spanning frontend and backend architecture. Completed a 6-month Full-Stack Developer internship at Samuel Gnanam IT Centre, developing and integrating web applications and REST APIs using Java, Spring Boot, React, JavaScript, TypeScript, Python, Node.js, and SQL relational databases (PostgreSQL, MySQL). Passionate about continuous learning, modern software engineering methodologies, and building robust, scalable solutions across full-stack and backend development.

Education

BSc (Hons) Computer Science – Software Engineering <i>(Currently Pursuing)</i>	2026 – Present
BCAS Campus / Goldsmiths University of London	
HND in Computing <i>(Completed)</i>	2024 – 2026
BCAS Campus – Jaffna	
Diploma in English and IT	2024
ESOFT Metro Campus, Jaffna	
G.C.E. Advanced Level (Bio Stream)	2020
J/Chavakachcheri Hindu College	
G.C.E. Ordinary Level	2017
J/Chavakachcheri Hindu College	

Professional Experience

Samuel Gnanam IT Centre	May 1, 2026 – October 30, 2026
Full-Stack Developer Intern 6 Months (Completed)	
- Developed and maintained full-stack web applications using Java, Spring Boot, React, and TypeScript/JavaScript. - Developed and integrated REST APIs and worked with PostgreSQL/MySQL databases. - Worked on a Defect Tracker System including defect management, filtering, validation, and dashboard functionality. - Used Git/GitHub and Postman for version control, endpoint validation, and API testing. - Debugged application issues and worked on frontend-backend integration.	
Ceylinco Insurance	October 2021 – May 2022
Trainee / Office Assistant	
- Assisted with daily administrative and operational tasks within the organization. - Maintained customer-related records and documentation with accuracy and diligence. - Developed communication, teamwork, and professional workplace skills. - Gained practical exposure to office systems, customer handling, and business operations.	

Research & Projects

Defect Tracker System	Full-Stack Software Development
- Developed a full-stack defect tracking web application for recording, tracking, and resolving software defects across development cycles. - Implemented defect management workflows, multi-criteria filtering, input validation, and an interactive dashboard for defect metrics.	
Technologies: React, Java, Spring Boot, PostgreSQL, REST APIs, Git, GitHub, Postman	
Cybersecurity Research Project	Individual Research
<i>Detection of Hidden Security Risks in Screen Sharing Based on User Experience</i>	
- Conducted research to detect hidden security and privacy risks in screen sharing using user experience analysis. - Used Python for analysing collected data and identifying security risk factors. - Applied research, analytical thinking, and problem-solving techniques throughout the study.	
Technologies: Python, Data Analysis, UX Research, Security Risk Analysis	

Projects (Continued)

Banking System

Console Application

- Developed a console-based banking system using Java applying Object-Oriented Programming (OOP) and Data Structures & Algorithms.
- Implemented core banking functionalities including account management, deposit transactions, withdrawals, and fund transfers.

Technologies: Java, OOP, Data Structures, Algorithms

Bakery Website

Web Application

- Developed a responsive web application with relational database integration.
- Implemented dynamic product browsing, contact forms, and order handling functionalities.

Technologies: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap

Medicare Hospital Management System

System Architecture

- Developed a hospital management system using Python adhering to SOLID principles and clean coding practices.
- Improved system scalability and maintainability through structured architecture and design patterns.

Technologies: Python, OOP, SOLID Principles, Design Patterns, Clean Code

City Electronics POS System

Desktop Application

- Developed a Point-of-Sale (POS) system for billing, product catalog management, and inventory tracking.
- Implemented product handling, transaction processing, and invoice generation using Java file handling.

Technologies: Java, OOP, File Handling

Skills

Programming: Java, JavaScript, TypeScript, Python, PHP

Frontend: HTML, CSS, React, Bootstrap

Backend: Java, Spring Boot, Node.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, MariaDB

Tools: Git, GitHub, Postman, Maven, Gradle, VS Code, IntelliJ IDEA, MySQL Workbench

Cloud: Microsoft Azure

Other: Figma, Canva, MS Office

Soft Skills: Problem Solving, Teamwork, Communication, Leadership, Adaptability, Time Management, Creativity

Languages

Tamil, English

Certifications and Training

- Diploma in IT and English – ESOF Metro Campus
